NOTES: A) The Treated Water (TW) Pipeline was shown on the plans as a 6" diameter pipe, but should have been an 8" diameter. This increased pipe size will meet current and future design requirements. Additionally, the 6" diameter Raw Water (RW) Pipe to the fire hydrants has been increased to a 12" diameter and extended 204 feet to the driveway entrance to accommodate a future connection from the Boulder Creek Intake. This upsized pipe will allow the City to utilize the full water right from Boulder Creek in the future. Approved by Jim Hodges, P.M. B) The project architect requested that one course of the accent CMU's for the Administration building have a "Ground-Face" finish, which is different from the plans. Approved by Jim Hodges, P.M.
